LANGUR IS A TYPE OF MONKEY LANGURS CAN SURVIVE IN DIFFERENT TYPES OF ECOSYSTEMS: WARM AND HUMID SWAMPS, DRY TORN SCRUBS, DESERTS, LOWLAND AND MOUNTAIN FORESTS AND EVEN URBAN AREAS LANGURS CAN REACH 17 TO 31 INCHES IN HEIGHT AND 11 TO 40 POUNDS IN WEIGHT. THEIR TAIL CAN BE UP TO 42 INCHES LONG. MALES ARE LARGER THAN FEMALES. LANGURS ARE ALSO KNOWN AS "LEAF-EATING MONKEYS" BECAUSE THEY FEED MOSTLY ON THE LEAVES. OTHER THAN LEAVES, THEY ALSO EAT FRUIT, SHOOTS, ROOTS, SEEDS, FLOWERS, GRASS. LANGURS HAVE EXCELLENT EYESIGHT AND SENSE OF HEARING WHICH HELP THEM AVOID THE PREDATORS.

OTTERS ARE PERHAPS ONE OF THE MOST CHARISMATIC OF MAMMALS. THEY POSSESS CLEVERNESS AND PLAYFULNESS IN EQUAL QUANTITIES, AND AN ABUNDANCE OF CUTE. BUT DON'T LET THE ADORABLE FACE DISTRACT YOU FROM ALL THE MANY OTHER FASCINATING QUALITIES OF OTTERS. BABY OTTERS ARE CALLED PUPS. A GROUP OF OTTERS HAS A RANGE OF NAMES, INCLUDING A BEVY, FAMILY, LODGE OR, AS THEIR ENERGY LEVEL AND ANTICS MIGHT SUGGEST, A ROMP. WHEN IN THE WATER, A GROUP OF OTTERS IS CALLED A RAFT. EVEN OTTER DENS HAVE A SPECIAL NAME (OR TWO). THEIR RESTING SPOTS ARE CALLED A HOVER OR A COUCH, WHICH ARE USUALLY LITTLE MORE THAN A BED OF REEDS. BUT OTTERS ALSO USE WHAT'S CALLED A HOLT. HOLTS ARE SMALL UNDERGROUND DENS WHERE OTTERS CAN ESCAPE DANGER, TAKE SHELTER, AND WHERE FEMALES RAISE THEIR YOUNG.

HIMALAYAN BLACK BEARS HAVE A BLACK COAT WITH A LIGHT BROWN MUZZLE AND A PALE YELLOW CRESCENT ON THEIR CHEST. ON AVERAGE, THEY MEASURE FROM 56 TO 65 INCHES NOSE TO TAIL AND WEIGH FROM 200 TO 265 POUNDS, THOUGH THEY MAY WEIGH AS MUCH AS 400 POUNDS IN THE FALL WHEN THEY ARE FATTENING UP FOR HIBERNATION. THEY ARE DIURNAL BY NATURE, THOUGH THE MAJORITY OF THEM HAVE BECOME NOCTURNAL IN ORDER TO AVOID HUMANS. THEY OFTEN SPEND THE DAY IN CAVES OR HOLLOWED OUT TREES. THEY ARE OMNIVOROUS CREATURES AND WILL EAT JUST ABOUT ANYTHING. THEIR DIET CONSISTS OF ACORNS, NUTS, FRUIT, HONEY, ROOTS, AND VARIOUS INSECTS SUCH AS TERMITES AND BEETLE LARVAE.

WILD BOARS ARE MEDIUM-SIZED ANIMALS. THEY CAN REACH 3 TO 6.5 FEET IN LENGTH, 21.6 TO 39.3 INCHES IN HEIGHT AND 90 TO 700 POUNDS IN WEIGHT. BODY OF WILD BOARS IS COVERED WITH DOUBLE COAT OF FUR THAT CAN BE BROWN, RED, BLACK OR GREY. UPPER COAT IS COMPOSED OF HARSH, BRISTLY HAIR. UNDERCOAT IS MUCH SOFTER. IT HAS LONG, RUBBERY SNOUT THAT IS USED FOR DIGGING OF UNDERGROUND ROOTS AND BULBS. THEY ARE NOCTURNAL ANIMALS (ACTIVE DURING THE NIGHT). THEY WILL SPEND 12H IN SLEEP DURING THE DAY, HIDDEN IN THE NESTS MADE OF LEAVES

MOST PEOPLE USE TERM "PEACOCK" TO DESCRIBE BOTH MALE AND FEMALE BIRDS, BUT PEACOCK IS ACTUALLY A NAME THAT REFERS TO MALE PEAFOWL. PEAFOWL BELONG TO PHEASANT FAMILY. THESE BIRDS ARE NATIVE TO ASIA. THERE ARE TWO SPECIES OF PEAFOWL: INDIAN PEAFOWL AND GREEN PEAFOWL. BOTH TYPES ARE ENDANGERED BECAUSE OF THE HABITAT LOSS, SMUGGLING AND PREDATION. MALE PEAFOWL IS CALLED PEACOCK WHILE FEMALE IS CALLED PEAHEN. THEY ARE ONE OF THE LARGEST FLYING BIRDS. THEIR LENGTH (INCLUDING TAIL) CAN REACH 5 FEET. THEY CAN WEIGH BETWEEN 8-13 POUNDS. THEY ARE OMNIVORES (EAT BOTH PLANTS AND ANIMALS). THEY LIKE TO EAT INSECTS, ARTHROPODS, AMPHIBIANS, FLOWERS, SEEDS... THEIR MAIN PREDATORS ARE TIGERS, LEOPARDS, MONGOOSE. WHEN THEY SENSE A DANGER, THEY FLY AND HIDE IN THE TREES. THEY SPEND NIGHTS ON TREES FOR THE SAME REASON.

SHY, ELUSIVE, OMINOUS AND EVIL ARE A FEW OF THE NUMEROUS ADJECTIVES THAT COME TO MIND WHEN WE THINK OF THE OWL. THIS PREDOMINANTLY NOCTURNAL AND SOLITARY BIRD FEATURES WIDELY IN FOLKTALES AND STORIES ACROSS CULTURES – BEING USED TO DESCRIBE AN INDIVIDUAL WHO IS WISE AND SENSIBLE, AND ASSOCIATED WITH BOTH GOOD AND EVIL POWERS. DESPITE THIS, THERE ARE SOME VERY INTERESTING FACTS ABOUT OWLS THAT WE DO NOT KNOW. IN FACT, DID YOU KNOW THAT WHILE MOST BIRDS MIGRATE TO ESCAPE INCONVENIENT WEATHER CONDITIONS, THE OWL NEVER LEAVES ITS NATURAL HABITAT?

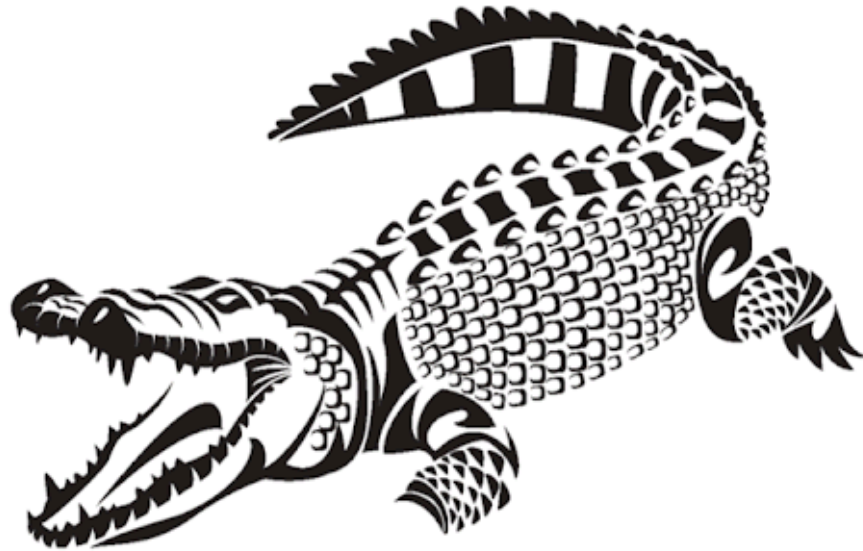

SPEAKING OF ITS HABITAT, OWLS ARE FOUND ACROSS THE WORLD, EXCEPT IN THE ICY CONTINENT OF ANTARCTICA. THEIR HABITAT STRETCHES FROM THE ARCTIC TUNDRA ACROSS THE GRASSLANDS OF AFRICA, DESERTS OF THE MIDDLE EAST AND THE FORESTS OF SOUTH ASIA

GHARIALS HAVE BETWEEN 106 AND 110 INTERLOCKING, RAZOR-SHARP TEETH, WHICH HELP THEM CATCH SLIPPERY FISH. THE LONG, NARROW SNOUTS OF GHARIALS HAVE LOW RESISTANCE, INCREASING THEIR SPEED THROUGH WATER. SALT-EXCRETING GLANDS ON THE TONGUES OF GHARIALS HELP THEM TOLERATE SALINE (SALTY) ENVIRONMENTS. OF ALL CROCODILIAN SPECIES, GHARIALS HAVE THE LARGEST EGGS, WEIGHING ABOUT 160 G (6.4 OZ.) EACH. GHARIAL EGGS ARE TEMPERATURE-DEPENDENT, MEANING THE GENDER OF THE HATCHLINGS IS DEPENDENT UPON THE TEMPERATURE IN WHICH THEY ARE INCUBATED. IN GENERAL, MALES ARE PRODUCED WITH WARM TEMPERATURES AND FEMALES WITH COOL TEMPERATURES. HATCHLINGS WEIGH 75 TO 130 G (2.6-4.6 OZ.) AND MEASURE 32.5 TO 39.2 CM (12.8-15.4 IN.).

FOXES ARE MEMBERS OF THE DOG FAMILY. A FEMALE FOX IS CALLED A "VIXEN", A MALE FOX IS CALLED A "DOG FOX" OR A "TOD" AND BABY FOXES ARE CALLED "PUPS", "KITS" OR "CUBS". A GROUP OF FOXES IS CALLED A "SKULK" OR A "LEASH". FOXES ARE THE ONLY TYPE OF DOG CAPABLE OF RETRACTING THEIR CLAWS LIKE CATS DO. FOXES ALSO HAVE VERTICAL PUPILS THAT LOOK MORE LIKE THOSE OF CATS THAN THE ROUNDED PUPILS THAT OTHER DOGS HAVE. A FOX'S HOME IS CALLED A "DEN". IT CAN BE A HOLE IN THE GROUND OR ELSEWHERE, SUCH AS UNDER A GARDEN SHED. HUNTERS OFTEN TRY TO SCARE FOXES OUT OF THEIR DENS BY SENDING IN DOGS SO THAT THE HUNTER CAN THEN SHOOT THE FOXES. SOMETIMES THE FOXES REMAIN IN THE DEN AND ARE INJURED OR KILLED BY THE DOGS.

THE INDIAN MUNTJAC DEER (MUNTIACUS MUNTIAC), ALSO CALLED THE 'BARKING DEER', IS THE MOST NUMEROUS OF THE MUNTJAC DEER AND LIVES IN SOUTH-EASTERN ASIA, IN PAKISTAN, INDIA, NEPAL, AND ALONG SOUTH-EASTERN ASIA AND SOUTHERN CHINA. IT GETS ITS NICKNAME 'BARKING DEER' BECAUSE OF THEIR BARKING LIKE DOGS WHEN THREATENED. THEIR DIET CONSISTS OF LEAVES, GRASSES, SHOOTS, AND FALLEN FRUIT. MUNTJACS ARE CONSIDERED A VERY PRIMITIVE KIND OF DEER, AS THEY APPEARED 15-35 MILLION YEARS AGO WITH FOSSILS FOUND IN FRANCE AND GERMANY. MUNTJACS ARE HUNTED FOR THEIR MEAT AND SKIN, AND ARE CONSIDERED A PEST IN SOME AREAS, WHERE THEY DESTROY THE TREES BY RIPPING OF THE BARK.

BROWN HARES ARE EASY TO TELL FROM RABBITS AS THEY ARE MUCH LARGER, WITH LONGER EARS AND LIMBS AND ARE MORE UPRIGHT IN POSTURE. THEY ARE HERBIVORES AND FEED ON YOUNG BROADLEAVED PLANTS, CROPS, BERRIES, FUNGI AND ROOTS. THEY NORMALLY SWITCH FROM HERBS IN THE SUMMER TO GRASSES IN THE WINTER. HARES RELY ON RUNNING FAST TO PUT DISTANCE BETWEEN THEMSELVES AND DANGER. THEY ARE THE FASTEST LAND MAMMAL IN THE UK, ABLE TO REACH SPEEDS OF 35 MILES PER HOUR

TO COMMUNICATE, MONKEYS USE FACIAL EXPRESSIONS, VOCALIZATIONS AND BODY MOVEMENTS. HEAD BOBBING, GRINNING, PULLING THE LIP AND YAWNING ARE SOME SIGNS OF AGGRESSION IN MONKEYS. GROUP OF MONKEYS IS CALLED A TROOP. TREES, GRASSLANDS, MOUNTAINS, FORESTS AND HIGH PLAINS ARE THE MOST COMMON PLACES WHERE MONKEYS LIVE. THE LARGEST MONKEY IS THE MALE MANDRILL, WHICH WEIGHS ALMOST 35 KILOGRAMS AND 1 METER LONG. MONKEYS CARRY HEPATITIS, TUBERCULOSIS, AND SIMIAN HERPES B. MOST OF THE MONKEYS EAT BOTH PLANTS AND ANIMALS, SOME MONKEYS ALSO EAT DIRT.

MONKEYS
