INDIAN CUISINE - INDIAN CULTURE

The Indian cuisine is closely related to the Indian history, each historical region developing a unique set of dishes, using diverse ingredients. However, a constant remains for all regions: the affinity for sweet desserts and spicy snacks. Besides being closely related to history, Indian cuisine is also strongly influenced by the Indian religion, Indian culture and traditions and the Indian people themselves.

If you can appreciate the facts behind the history of Indian food, the setting in which this great country's cuisine was formed, the influences it took and the diversity it created, then you will surely appreciate one of their sweet desserts or one of their spicy snacks and appetizers. No other country has a wider selection of exotic dishes and no other country can offer such a large variety of impulses for your taste buds.

THANKS FOR VISIT
