A Note from Us

All our servers are part of the Back to School Project by our NGO, Knognat Foundation. Through this initiative, young learners from underprivileged communities are given hands-on training, education, and employment opportunities.

They are still in training, and while we take great care to guide them, there may occasionally be a slip. We request your patience and kindness as every interaction here helps them grow into confident professionals.

Thank you for being part of their journey — your support makes a difference.
